-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- 1.) In claim 1, lines 4-5, "which locally has a higher intensity is reflected more strongly at that location than light which locally has a lower intensity" is vague and indefinite because "that location" lacks a positive antecedent basis and examiner has no idea what a lower or higher intensity is with regard to other conventional light guide intensities.

- 2.) In claim 17, lines 5-6, "which locally has a higher intensity is reflected more strongly at that location than light which locally has a lower intensity" is vague and indefinite because "that location" lacks a positive antecedent basis and examiner has no idea what a lower or higher intensity is with regard to other conventional light guide intensities.

4. Regarding claims 1-17, claim 1, line 3 and claim 17, lines 3-4 the phrase "such a manner" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

As best understood the following rejection applies:

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by (U.S. Patent 4,335,421, GB 2358513 and U.S. 4,267,489). (U.S. Patent 4,335,421, GB 2358513 and U.S. 4,267,489). A lighting device comprising at least one light source arranged in a housing for emitting a lighting beam through a light-transmitting plate of the housing, wherein said plate is provided with means which reflect incident light on the plate, in such a manner that light which locally has a higher intensity is reflected more strongly at that location than light which locally has a lower intensity, characterized in that said means comprise at least one light-transmitting plate, which is locally provided with a patterned reflective material, the provided reflective material reflecting more than

80% of the incident light thereon.

Allowable Subject Matter

7. Claims 4-16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sejkora et al '955, Osawa '416 and Kanda '873 discloses lighting assemblies which are similar to applicant's invention.
